

Dear FCC,

I am very upset at the fact that there are double standards when it comes to allowing local programming with HD content. I am currently able to receive Channel 4 (CBS) out of Boston in non HD format on my DirectTV. I cannot receive Channel 13 (CBS) from Portland ME because the signal is too weak over the antenna. DirectTV broadcasts CBS HD every night. They claim they cannot offer it to me because of channel 13. But if they are already offering me Channel 4, then what is the issue with offering CBS HD? It makes absolutely NO SENSE and this needs to be resolved asap. I expect a call to discuss how we can resolve this problem immediately.
